SORAMITSU 2016–2025 ソラミツ

April 2025

A Memo to the SORA Community

This document accompanies the invoice sent to SORA for the services provided by SORAMITSU.

April 2025 was an incredible month of accomplishments. The SORA Integrated Plan remains the roadmap for SORA network development, and progress has been steadily advancing.

This memo will provide a perspective on the activities for each track, a description of the development activities specific to this month, and the total number of hours served to the SORA community, as presented in invoice number 900124.

1   SORA (Substrate) – 1,039 hrs

This month's work focuses on the <u>TON bridge</u> and SORA v3 development.

Bridges

The team continued with quality assurance and **testing activities across multiple bridge technologies**, including HASHI, TON, and Substrate.

These efforts are focused on **enhancing interoperability, ensuring security**, and validating system performance to support robust cross-chain operations within the SORA ecosystem.

Builders

Regular synchronization is maintained with builders and ecosystem stakeholders to align on priorities, share progress, and coordinate ongoing initiatives.

A significant focus remains on collaborating with government actors to **co-develop solutions that foster economic growth in developing countries**.

Comprehensive project management, design, and development activities are progressing steadily, supported by consistent communication and stakeholder engagement.

Key milestones include the development of a new website and web application, the creation of a reliable back-end and supporting database infrastructure, and the continued build-out of a dedicated mobile application to **expand user accessibility**.

Other

Routine maintenance and fixes have been applied to the codebase to **ensure operational stability** and improve performance. Core infrastructure components, including the pricing server, price tools, and network nodes, are actively maintained.

Additionally, the team has prioritized the **continuous documentation** of SORA's implementation and vision within the wiki, **ensuring transparency and clarity for contributors and users alike**. Data analysis of network activity and ecosystem dynamics is ongoing, providing critical insights that inform strategic, data-driven decision-making.

Active collaboration with partner builders includes regular meetings, brainstorming sessions, and joint planning efforts to implement impactful projects on the SORA platform. Strategic planning has also commenced for SORA v3, with cross-functional coordination driving the next phase of ecosystem development forward.

1.1 SORA Backend

- Bridges:
  - QA and testing activities (HASHI, TON, Substrate).

- Builders:
  - Regular synchronisation with builders and ecosystem stakeholders;
  - Working with government actors to develop solutions to support the economic growth of developing countries:
    a. Project Management, Design, and Development activities;
    b. Continuous communication and synchronization with stakeholders;
    c. Development of website and webApp;
    d. Development of back-end and database;
    e. Development of a dedicated mobile application.

- Others:
  - Codebase routine maintenance and fixing.
  - Maintenance of infrastructure (pricing server, price tools, nodes).

- Project management activities (daily meetings, planning, retrospectives);
- Quality assurance and testing activities, as well as the development of automated tests;
- Data analysis of the network and ecosystem to drive data-driven decision-making;
- Meeting, brainstorming and planning with builders partners for implementing projects on SORA;
- Brainstorming, strategizing, and planning for SORA v3.

1.2 Mobile Apps (SORA Card)

- Builders:
  - Development of a white-label mobile wallet to support the implementation of a business use case from an ecosystem partner;
  - Design activities;
  - Project management activities.

- SORA Card
  - QA and testing activities;
  - Communicating and synchronizing with partners.

2 Substrate (PSWAP) – 35 hrs

Polkaswap has received ongoing improvements, including:

- Hashi bridge improvements and optimisation;
- Multi-signature support;
- SORA redenomination support.

3   DevOps and Security – 76 hrs

The work done this month by DevOps covers both the SORA network and its underlying infrastructure. Here are more details:

3.1 SORA Blockchain

- Improved CI/CD pipeline;
- TON bridge deployment to prod env.

3.2 Parachain

- Fix deployment, operations.

3.3 Polkaswap

- Operations;
- Pricing, SuQuery updates.

3.4 Mobile Clients

- Apple Store app management.

3.5 SORA Card

- Apple Store app management;
- Prod release.

4   Education – 259 hr

Educational operations this month included:

4.1 SORA

- Social media management;
- Ecosystem Update;
- Weekly network digest recap;
- Alignment and coordination for business-oriented initiatives;
- Ongoing SORA wiki maintenance and feature documentation covering new releases for users and builders;
- Cross-team, cross-department synchronization and planning on processes;
- Product-education collaboration on campaigns;
- Data analysis of the network and ecosystem to drive data-driven decision-making;
- Meeting and brainstorming with builders partners for implementing projects on SORA;
- Brainstorming, strategising, and planning for SORA v3.

- Expenses of attending high-impact in-person events and business-to-government (B2G) meetings.

5   Total Hours – 1,409 hr

Additionally, invoice 900123, attached, pertains to cloud server costs for
April 2025.

Your ongoing support is greatly appreciated. We look forward to continuing
to serve you.

Sincerely,

SORAMITSU Helvetia AG
