SORAMITSU 2016-2025 ソラミツ

October 2025

A Memo to the SORA Community

This document accompanies the invoice sent to SORA for the services provided by SORAMITSU.

October 2025 was an incredible month of accomplishments. The SORA Integrated Plan remains the roadmap for SORA network development, and progress has been steadily advancing.

This memo provides an overview of activities for each track, a description of the development activities specific to this month, and the total number of hours dedicated to the SORA community, as presented in invoice number 900136.

1 SORA (Substrate) – 512 hrs

This month's work focuses on SORA v2 maintenance, specifically preparing a runtime update for the mainnet and parachains and developing SORA v3.

Blockchain

The team continues to maintain and update the **SORA wiki**, ensuring that the implementation details, long-term roadmap, and overarching vision of the SORA ecosystem remain clearly documented. This ongoing effort helps maintain alignment across teams and provides contributors with an authoritative and accessible source of truth.

Alongside documentation, the team conducts continuous **data analysis of the network and broader ecosystem**, using insights from activity patterns, user behaviour, and system performance to support data-driven decision-making across development and strategy.

Regular **meetings, brainstorming sessions, and planning discussions** are held with builders and ecosystem partners to support the development of new projects on SORA and the upcoming **SORA Nexus (SORA v3)**. These collaborative exchanges help identify integration opportunities, refine technical requirements, and strengthen the foundation for future applications.

Significant progress has been made on next-generation infrastructure: **SORA v3 (Nexus)** and the **Iroha 3 repository** are now complete, though currently private. Work on the SORA Nexus whitepaper is ongoing, and it will offer insight into the network's architecture, new features and the direction of its evolution.

In addition, **Hubchain Phase 2** has been completed, and several conceptual features from that work are now strong candidates for implementation in SORA Nexus.

A **refinement and planning session** was recently conducted to evaluate the migration pathway from **Iroha 2 to Iroha 3**. While the technical approach and requirements have been clarified, the complete migration **has been put on hold until further notice**, allowing the team to prioritize other ecosystem-critical developments.

On the blockchain side, **Update 4.7.4** has been released, introducing several improvements. This includes a **code override**, adjustments to the **fee multiplier**, and general refinements to enhance performance and stability.

Work is also in progress on the **SORA Kusama Parachain update**, which includes **Asset Hub compatibility** and a broader **Substrate upgrade**. In parallel, similar efforts are underway for the **SORA Polkadot Parachain update**, ensuring parity between networks through Asset Hub compatibility and Substrate modernization.

1.1 SORA Backend

- Released Update 4.7.4:
  - Code override
  - Fee multiplier update

- SORA Kusama Parachain Update in progress:
  - Asset Hub compatibility
  - Substrate Upgrade

- SORA Polkadot Parachain Update in progress:
  - Asset Hub Compatibility
  - Substrate upgrade

- Others:
  - Codebase routine maintenance and fixing

- Project management activities (daily meetings, planning, retrospectives);

- Quality assurance and testing activities, as well as automated testing development;

- Data analysis of the network and ecosystem to drive data-driven decision-making;

- Meeting, brainstorming and planning with builders' partners for implementing projects on SORA;

- Building, strategizing, and planning for SORA v3:
  - Sora v3 (Sora Nexus) and Iroha 3 repo in progress:
    a. Sora v3, aka Nexus, in progress
    b. Migration from Iroha 2 to Iroha 3 has been postponed.

2 DevOps and Security – 3 hrs

The work done this month by DevOps covers both the SORA network and its underlying infrastructure. Here are more details:

2.1 SORA Blockchain

- CI/CD pipeline
- Maintenance
- Support

2.2 Parachain

- Operations
- Maintenance
- Support

2.3 Polkaswap

- Operations
- Pricing, SubQuery updates
- Maintenance
- Support

2.4 Mobile Clients

- Apple store app management

3 Education – 207 hr

Educational operations this month included:

3.1 SORA

- Social media management;
- Alignment and coordination for business-oriented initiatives;
- Ongoing SORA wiki maintenance and feature documentation covering new releases for users and builders;
- Cross-team, cross-department synchronization and planning on processes;
- Product-education collaboration on campaigns;
- Data analysis of the network and ecosystem to drive data-driven decision-making;
- Meeting and brainstorming with builders partners for implementing projects on SORA;
- Brainstorming, strategising, and planning for SORA v3;
- SORA v3 Whitepaper production.

- Expenses of attending high-impact in-person events and business-to-government (B2G) meetings.

4 Total Hours – 668 hr

Additionally, invoice 900135, attached, pertains to cloud server costs for October 2025.

Your ongoing support is greatly appreciated. We look forward to continuing to serve you.

Sincerely,

SORAMITSU Helvetia AG
